

Journal of Advances in Environmental Technology (AET)

Under permission of the Ministry of Science, Research and Technology of Islamic Republic of Iran.

Advances in Environmental Technology (AET) is an international, open access, peer review, interdisciplinary and free charge publication. This journal appears four times a year and covers all aspects at the forefront of original environmental research in science, engineering and technologies. It publishes peer reviewed full length research papers, short communications, case studies, and critical review papers reporting on major advances in environmental areas. This academic journal is published jointly by the Iranian Research Organization for Science and Technology (IROST) and the Iranian Association of Chemical Engineers (IACHE).

Scope

- Water quality and pollution control
- Water and wastewater treatment
- Soil pollution and remediation
- Solid and hazardous wastes
- Air quality and pollution control
- Noise, light and thermal pollution and control
- Environmental chemistry
- Remediation and bioremediation
- Environmental risk assessment
- Green technologies for environmental sustainability

Indexed in:

- Scopus
- DOAJ
- ISC
- Google Scholar
